

Technical Buyer

(m/f/d)

🕒 **FULL TIME** 📍 **HYBRID (GILCHING)**

What do Formula 1 racing cars, aircraft engines, drones and wind turbines have in common? In all these applications and many more, the aerodynamics are optimized and controlled by products from Vectoflow. From an individual probe to a complete system: using 3D printing and smart software solutions, we develop individual flow measurement technology.

As Technical Buyer, you will be responsible for ensuring material availability, managing supplier relationships and supporting the further development of our procurement and supply chain processes. Working closely with engineering, production and management, you will play a key role in supporting Vectoflow's continued growth and production scaling. This hands-on-role combines operational purchasing responsibilities with the opportunity to improve and help shape procurement and supply chain structures in a growing aerospace technology company.

TASKS & RESPONSIBILITIES

- Build, own and scale the end-to-end supply chain from prototype phase to serial production
- Take full ownership of operational and strategic purchasing, including supplier sourcing, negotiation, and contracting
- Ensure material availability, cost efficiency, and on-time delivery, including management of long-lead and critical components
- Develop and implement material planning, inventory, and logistics concepts tailored to a growing SME
- Qualify, audit, and develop suppliers in line with EN9100 / aerospace requirements
- Proactively manage supply chain risks, bottlenecks, and quality issues
- Define and track KPIs to monitor supplier performance and drive data-based decisions
- Collaborate closely with engineering, production, and quality to align supply chain with product and process requirements
- Provide transparent reporting on performance, risks, and improvement measures to management

QUALIFICATIONS

- Degree in Industrial Engineering, Mechanical Engineering, or a related field
- 5+ years of experience in supply chain, procurement, or operations within a technical or manufacturing environment
- Proven hands-on experience in purchasing and supplier management, including sourcing, negotiation, and contracting
- Experience in scaling operations from prototype to serial production, ideally in a fast-growing or evolving organization
- Solid understanding of BOM structures, lead times, and production workflows
- Strong negotiation skills and confident communication with international suppliers
- A structured, pragmatic, and execution-focused mindset with a strong sense of ownership
- Ability to work independently while collaborating closely with engineering, production, and quality teams
- Strong analytical skills, including advanced Excel and data-driven decisionmaking
- Hands-on experience with ERP/MRP systems in SMEs (e.g. Odoo, SAP Business One, NetSuite or similar)
- You have an advantage with:
 - Experience in aerospace, sensors, UAVs, or other high-tech industries;
 - Familiarity with EN9100 environments or EASA Part 21G regulated supply chains;
 - Experience with regulated or export-controlled supply chains
- Fluency in English and German

YOUR BENEFITS

- The opportunity to grow with the company and advance your career in the aerospace and deep-tech sector
- A dynamic, highly motivated team with the ambition to establish Vectoflow as a leading player in the aerospace market
- The chance to take ownership and shape processes in a fast-growing technology company
- A flexible working model with a combination of office presence and up to two days of home office per week
- Subsidized public transport (Deutschlandticket)
- Corporate Benefits employee discount program
- JobRad bicycle leasing
- Access to an excellent subsidized canteen
- The opportunity to work on cutting-edge technologies used in aerospace, drones, turbomachinery, and advanced engineering
